

Ibukun Faloye is a seasoned environmental strategist and Nature-Based Solutions (NbS) specialist with over 25 years of experience in the design and execution of Afforestation, Reforestation, and Regenerative (ARR) projects. With a strong multidisciplinary foundation in Political Science, Philosophy, and Economics (PPE) from Obafemi Awolowo University, he brings a rare blend of technical expertise and policy insight to the global climate arena. His work is grounded in developing high-integrity environmental strategies that generate credible carbon credits while advancing ecological restoration, biodiversity, and sustainable land management practices.

Driven by a mission to bridge ecological necessity with economic viability, Mr. Faloye is at the forefront of deploying scalable, impact-driven climate solutions. His leadership in carbon markets and regenerative systems reflects a deep commitment to aligning environmental stewardship with community empowerment, ensuring that nature-based interventions deliver both global climate value and tangible local benefits.
