

Grace Dominic is a forestry and climate resilience professional specializing in natural resource management, hazard mitigation and management, forest restoration, and nature-based solutions. She holds a Master of Forestry from the Yale School of the Environment and a Bachelor's degree in Forestry and Environmental Management from Michael Okpara University of Agriculture, Umudike, Nigeria. Throughout her career, she has worked across academia, government, nonprofit organizations, and the private sector, contributing to research, policy development, technical consulting, and community-based environmental initiatives.

Grace is passionate about advancing sustainable environmental management through science-driven policy, ecosystem restoration, and collaborative approaches to climate resilience. Her interests include wildfire resilience, forestry, nature-based climate solutions, and environmental governance, with a commitment to translating research into practical solutions that strengthen communities and restore ecosystems. Through technical consulting, research, and policy engagement, she seeks to contribute to more resilient landscapes and sustainable environmental management.
