

Joyce Olewe is the Co-Founder and Executive Lead, Business Development, Strategy & Partnerships at ACE — African Carbon Exchange, where she leads the vision and execution of a platform designed to aggregate, structure, and scale high-integrity carbon projects across Africa—bridging local ecosystems with global carbon markets. She is a multidisciplinary strategist operating at the intersection of climate innovation, carbon markets, African development, and the global energy transition.

With over two decades of experience spanning business consulting, public policy, and sustainability, Joyce brings a systems-level approach to complex challenges. Her work is centered on unlocking Africa's natural capital through climate finance, nature-based solutions, and transparent carbon frameworks that deliver both environmental integrity and community impact. She is also the founder of Clara's Garden, an agribusiness consortium advancing sustainable West African food systems, and has led initiatives across global policy, economic development, and logistics.

Joyce holds a Dual MBA from Cornell University and Queen's University (2021), a Master of Global Affairs from Rice University (2019), a Master of African Area Studies from UCLA (2001), and a Bachelor of Arts in Fine Arts from Texas Southern University (1998). Originally trained as a sculptor and educator, Joyce brings a creative, design-driven lens to systems thinking and innovation. A winner of the MIT Africa Takes on COVID-19 Challenge (Energizing Healthcare Systems track), she is recognized for translating complex ideas into scalable, real-world solutions.
