

Femi Aiki is Co-Founder / Regenerative & Sustainable Agriculture Director at ACE — African Carbon Exchange, where he drives the development of high-integrity, agriculture-based carbon projects across African markets. As Co-founder and CEO of Foodlocker.africa, an AgTech and FoodTech platform operating across sustainable agriculture and distribution, Femi brings deep, hands-on experience in building scalable systems within the food value chain—directly informing ACE’s approach to soil carbon, regenerative agriculture, biogas, and climate-smart land use.

With a global professional footprint spanning Amazon (UK), Hitachi Rail (Italy & Saudi Arabia), Infosys (India), and First Bank of Nigeria, Femi combines operational rigor with entrepreneurial vision. A 4x founder, he holds an MBA from ESADE Business School, a Masters in International Business Engineering from Leonardo SpA (Fhink), and an MSc in Petroleum Engineering (Reservoir Major) from Imperial College in London. He is a First-Class Chemical Engineering graduate of the Obafemi Awolowo University, and brings a multidisciplinary lens to advancing climate finance, sustainable agriculture, and carbon market innovation through ACE
